Continuation of 10. Other: the examiner still believes that Schubert's reference's teaches the "...compensating for departures of quantities of filter material from predetermined quantities." as claimed, see for example Figs. 3-7 and column 4, lines 74 and 75 and column 5, lines 1-11, via filter displacing member 46 compensating for departures of quantities of filter material from hopper 12 from predetermined quantities via from the hole amount of powdery filter material on the hopper. The examiner still believes that applicant is arguing about what the invention is about and what was descriped in the specification of the invention, but not what is been claimed.
